

Technical Information JX4300

Energy per flash : 40 J
Maximum intensity
 in white : 20 000 cd
Period of 4 flashes : 2 s
Optional brilliance
 selection : 100% (day mode), 10% (crepuscular mode), 3% (night mode)
Brilliance selector : Short circuit.
Alarm reporting : A relay switches on when alarm occurs on one supply box.

Working voltage : 230 V AC 50/60 Hz +/- 10% (110V AC 60 Hz on demand)
Consumption : less than 200 W
Power factor : better than 0,95

Ambiant -25 °C to + 55 °C (an optional **heater resistor** can be mounted on
temperature rating : demand when moisture level is particularly high or external temperature
particularly low.)
IP 66 cabinet

External
dimensions : 400 mm x 300 mm x 160 mm
Weight of the
supply box : 11 kg
Weight of the light
head : 7 kg

The set is delivered with a 5 m special light head cable, 5 m remote control cable and 2 m mains cable.

An optional **photocell** can be connected on demand to switch the brilliances automatically.
