

Technical Information JX2300

Ability to adjust flash period:	0,5 s, 1s, 1.5 s ou 2 s
Inter flash delay setting	14 ms, 67 ms, 267 ms
capability:	Individual flash counter on each lamp.
Planned Maintenance:	100% (day), 10% (dusk), 3% (night)
Brightness selection:	Digital control via the RS485 (J-Bus) line
Brightness switching:	Dry contacts on simple systems.
Alarm Return:	in the RS485 line. The processing of this information is available on a port 5556 to an Automate
Operating voltage:	230 V AC 50/60 Hz +/- 10% (110V AC 60 Hz on request)
Energy consumption:	less than 100 W
Operating temperature:	0 °C à + 55 °C
Weight:	Rack 19 » 1U standard 2 kg
